Monterey Boats Unveils the All-New Elite 30: A Fusion of Luxury, Performance, and Innovation

WILLISTON, FL – August 16, 2024 – Monterey Boats is excited to announce the launch of the Elite 30, the latest addition to our prestigious lineup of luxury boats and the inaugural model in the new Elite series. This groundbreaking boat combines exquisite design, advanced technology, and superior performance to redefine the boating experience.

The Elite 30 is a testament to Monterey Boats' commitment to innovation and excellence. Designed with the discerning boater in mind, this new model offers unparalleled comfort, state-of-the-art features, and exceptional versatility. Whether you're seeking thrilling water sports, serene cruises, or memorable gatherings with family and friends, the Elite 30 delivers on every front.

Key Features of the Elite 30:

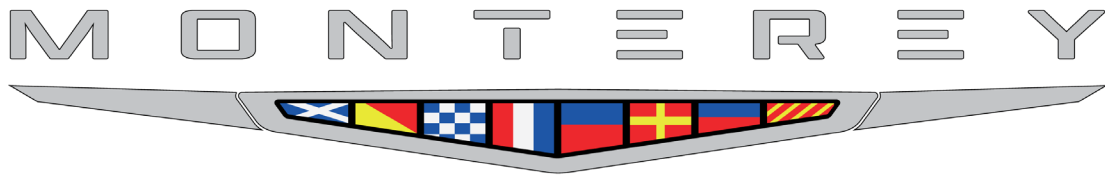

Sleek Design: The Elite 30 boasts a modern and stylish design with clean lines and premium finishes, making a bold statement on the water.

Spacious Layout: With ample seating and a thoughtfully designed layout, the Elite 30 provides plenty of space for relaxation and entertainment. The port and starboard helm seats feature flip-up thigh rise bolsters and slides, offering unparalleled comfort and maneuverability, all under the oversized fiberglass hardtop. Additional seating options include the cockpit's aft-facing seat, a sun pad with articulating backrests, and spacious bow seating with access to a large head compartment.

Advanced Technology: The Elite 30 is equipped with the latest in marine technology, featuring a revolutionary helm design with a Simrad 15" Ultra-Wide multifunction display for top-notch navigation and control of the CZone digital switching system. Premium audio options further enhance your boating experience.

Superior Performance: Monterey's Vertical Stem Technology allows the Elite Series to cut through the water and pass easily through waves providing a clean dry ride. The 21-degree hull deadrise at the transom provides a comfortable ride without allowing it to roll excessively with shifting passengers, broad seas or crisp turns. Powered by robust engines and engineered for smooth handling, the Elite 30 ensures a powerful and responsive ride.

Luxurious Amenities: For entertainment, the Elite 30 has it all. The cockpit includes a wet bar with a solid surface countertop, sink with freshwater faucet, and trash receptacle. A versatile cockpit table can be deployed in the bow

or aft cockpit. Convenient storage throughout the boat allows you to bring everything needed for a perfect day on the water and stow it away easily when heading home.

“Our team at Monterey Boats is incredibly proud to introduce the Elite 30,” said Charles Marshall, Co-Chairman of Monterey Boats. “This model represents the pinnacle of our design and engineering capabilities, and we are confident it will exceed the expectations of even the most discerning boaters.”
